

## INSTRUCTION:

### INSTALLING METATRADER 4 INDICATOR

This tutorial covers indicator installation for MetaTrader 4. ( If you dont have metatrader 4 you can get one by opening Demo or live account from many forex broker Online like :

[liteforex.org](http://liteforex.org) (Open real account with just \$1)

1. In your download ForexSingal folder, Copy and Paste this 2 file into the indicator folder:

True\_point\_signal.mp4

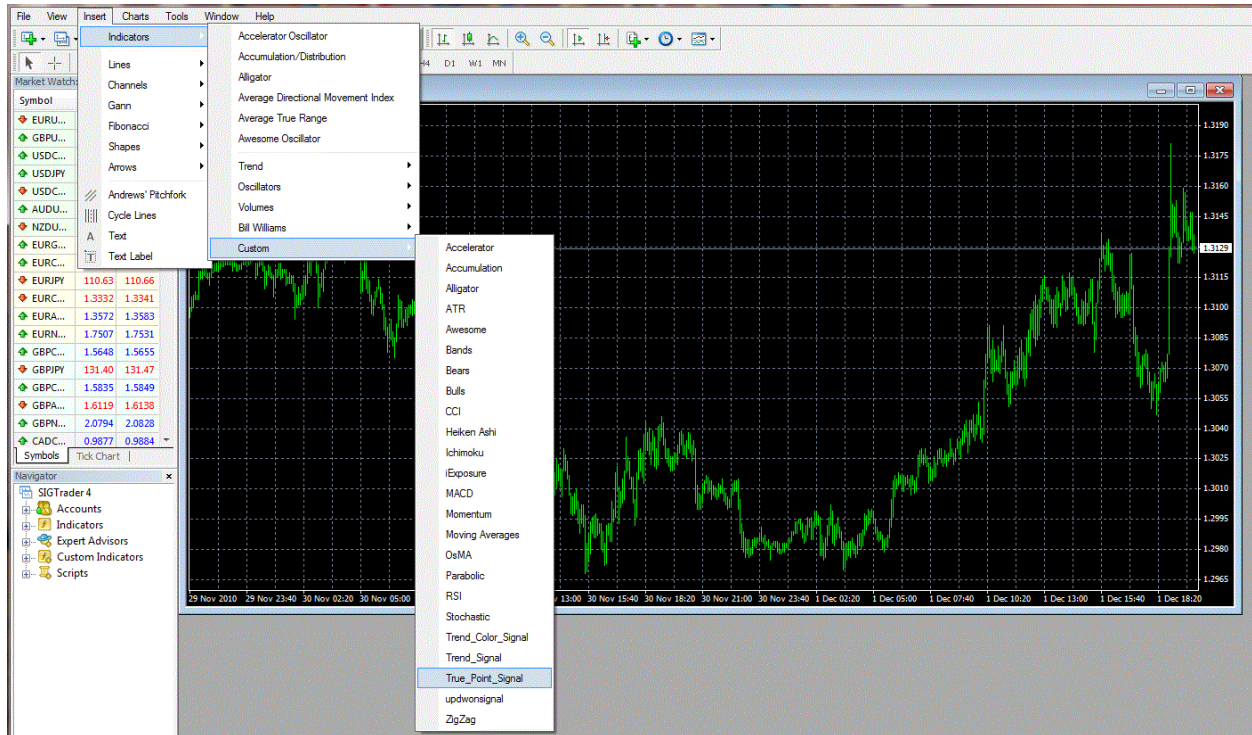

Trend\_color\_signal.mp4

Locate Metatrader4 indicator folder and save it to the 'indicators' folder inside the 'experts' folder of your MetaTrader4's installation folder:( most computer you can find the folder in:

C:\Programfiles\Metatrader4\experts\indicators)

2. After you get the .mp4 file in your indicators folder through download, you can start using it with your MetaTrader 4 platform. All you have to do is to attach it to the chart. If you know what

you are doing you might also want to change some of the color of Chart background to get better looks.

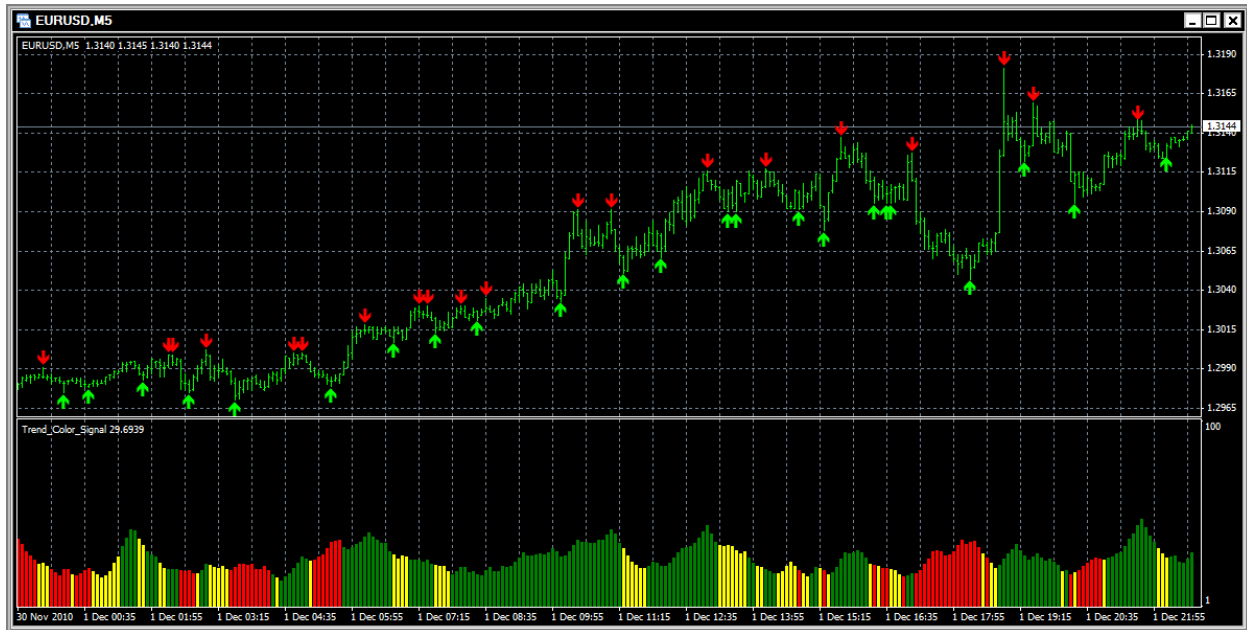

To Attach indicator to chart click Insert – Custom then Signal Indicator

**Attach both Indicator to the chart:**

True\_point\_signal.mp4

Trend\_color\_signal.mp4

And THE CHART should looks like this:

And if you want change the looks and color just hit F8.
