

Indicator System.

...signals without repaint.

# Installation Guide and User's Manual

Congratulations once again on your purchase of 4xrider indicator trading signal system.

You have taken the best decisions ever in your quest for freedom from guess trading in your forex career.

We'll like to draw your attention to the fact that 4xrider indicator is not like every other indicator that generates buy/sell signals everyday. It may not even trigger on some currency pairs for months.

4xrider does not give signal everyday. Hence, It is reliable and accurate each time it signals!

## How to Install:

**Step 1:** Copy and paste the 4xrider indicators into your meta4 indicator folder. Double click - **Local Drive(C:) - Program files - meta4 folder – expert - indicators.**

**Step 3:** Close down your meta4 platform and re-open it, then attach your indicators under custom indicators.

**Step 4:** You can now save your chart by clicking on your templates icon at the top of your chart and save templates. This will allow you to access other charts directly from your templates on each currency pair.

**Step 5:** Change all your currency time frames to 1 hour. 4xrider indicator only works on 1 hour time frame.

## Tradeable and Non-tradeable Alerts:

There is a need to understand that it is not every signal generated that is tradeable.

### Tradeable alerts:

An alert is tradeable whenever there is a pop-up alert sound on the platform with a correspondent 4xrider arrow appearing on the candle.

### Non-tradeable alerts:

An alert is considered non-tradeable whenever there is a pop-up alert sound on the platform without a correspondent 4xrider arrow appearing on the candle. We do not advise a trade to be placed based on the sound only but an alert sound plus a correspondent 4xrider arrow appearing gives a valid entry.

It signals an alert on the hour once or twice monthly in each currency pair. We advise that you install different demo platforms from different brokers. This would help you with good alternative confirmations whenever it triggers.

**Example:** It could trigger on Eur/Usd on a chart and not trigger on another brokers chart. There are times it triggers on all brokers charts. In this case you'll need to download about 2 to 3 demo meta4 charts from different brokers. You could also install it on your real account; Although it could be tossed not to trigger on real accounts by some brokers, however, real accounts could also serve as part of confirmatory charts.

### How Best to Trade 4xrider.

Whenever it appears, do not jump into the trade thinking it would leave you behind. You should wait for some pullbacks before you place your trade. You could even choose to add few indicators in order to fine-tune your entries. If you understand candle reading, you could decide to place an order when a reversal candle is formed on the hour after the trigger candle on which the first arrow appeared closed. Whichever way you decide to trade it, 4xrider would help you ride the trend for days.

### See our entry and exit examples below:

In the chart below, that wonderful opportunity triggered 04/26/2011 on Eur/Cad. You can back test and calculate how many pips we made that day. Study the strategic entry and exit using 5 sma on 1 hour chart.

**In the chart below, study how we strategically entered that sell opportunity using 5 sma.**

### Stop Loss

Your stop loss should be 10 pips above/below first 4xriders arrow that appeared. As for your exit, you may add few indicators to help. We prefer to use sma of 5 for our exit signals as demonstrated in the charts above.

Exit your sell signals whenever a bullish candle closes above your sma of 5.  
Exit your buy signals whenever a bearish candle closes below your sma of 5.  
You could also discover your own entry and exit method with the help of some other indicators.

Please read books on money management, we advise that you do not risk more than 5% of your equity in a trade.

### Our recommended currency pairs:

Eur/Usd	Eur/Jpy
Gbp/Usd	Eur/Aud
Usd/Jpy	Gbp/Cad
Usd/Chf	Chf/Jpy
Eur/Chf	Aud/Jpy
Gbp/Jpy	Eur/Cad

After installation, scroll backwards to previous months to see the wonders of 4xriders and how best you would have entered those wonderful trades, you would probably develop a personal, unique and insightful entries you might want to share with us.

Good trading.

**4x Rider Team.**
